Verbal Description:

This modeled censar fragment is composed of a bright yellow-orange paste with micaceous and white inclusions. It is a piece of a claw-foot, hollow, with a nail attached. The nail is hooked. It is 4.2 cm long. The bend occurs 2.3 cm from the sherd body. Then the nail drops to its point approx. 1.9 cm later. There is no webbing or flap of skin covering the nail. There is some sort of indentation to the right of the nail close to the sherd break. There is no paint, slip, brush stroking, or fire clouding visible.
